PROFESSIONAL SUMMARY

Licensed Georgia P&C producer and BBA candidate in Risk Management & Insurance at UGA's Terry College of Business (Class of 2027). Assurant Ventures Summer Analyst, now a Digital & AI Transformation Intern building an AI pipeline for vehicle service contract coverage mapping. Prior experience in P&C sales, state regulatory compliance, and agency accounting.

PROFESSIONAL EXPERIENCE

Digital & AI Transformation Intern | **Assurant Global Automotive** *Sept 2026 – Present*

Intern group in the AI transformation program, reporting to the VP of Innovation & Transformation

- Building the "explode the contract" step of the PCDB (parts/component database) initiative, which maps vehicle service contract (extended warranty) coverage to a ~40,000-component parts catalog that is currently mapped by hand.
- Developing the pipeline: AI extracts contract coverage language; deterministic Python rules expand it into covered parts per tier (Powertrain to Platinum), incl. exclusions and roll-ups; AI resolves only ambiguous leftovers from a fixed candidate list.
- Designing quality controls into each run, including 9 automated validation gates, an independent AI checker that grades each output, and a 500+ test suite.
- Supporting the ASAPP voice AI rollout: reviewing customer calls to assess containment (whether the voice AI resolves calls without a live agent) and writing and editing voice AI scripts.

Summer Analyst | **Assurant Ventures (a division of Assurant Inc.)** *May – August 2026*

Corporate venture / investment team

- Built an AI pitch-deck reviewer for a senior executive (~50 decks/week) producing one-page pre-reads: deal verdict, weak points, and anticipated diligence questions; caught 7/7 planted flaws in testing, now in active use.
- Ran founder sourcing calls and screened pipeline for portfolio fit using Harmonic; performed due diligence on active deals: property portfolio valuation vs. public records, cap rate analysis, convertible note and warrant return modeling.
- Led the fund's portfolio migration to Edda: reconciled investment data from IC memos, cap tables, and data rooms; built a master contact list via Aumni.
- Presented a capstone on a growth segment of the business to leadership; generated the deck in Python via Claude Code.

Regulatory Compliance Intern | **Georgia Dept. of Insurance & Safety Fire** *May – Jul 2025*

Full-time | State Regulatory Agency

- Assisted compliance review of P&C and health carriers — forms, rate filings, and regulatory practices.

Insurance Agent & Accounting Specialist | **Auto Town Insurance** *2022 – Aug 2024*

Part-time | P&C Agent (2023 – Aug 2024); Accounting Specialist (2022 – 2023)

- Sold and serviced P&C products via phone and in-person; managed full lifecycle from quote to renewal.
- Performed carrier reconciliation, underwriting support, general bookkeeping, and basic auditing within a licensed agency.

EDUCATION

BBA, Insurance & Risk Management | **University of Georgia** *Expected May 2027*

Terry College of Business

- Zell Miller Scholarship Recipient; top-ranked insurance program with coursework in risk analysis, underwriting, insurance operations, and financial management.

Study Abroad | **Georgia Tech Europe** *Spring 2026*

International Business & Economics | Metz, France
